Patent Search – DIY easily

Date:	Tuesday, 07.11.2023 / 1:30 pm until 5:30 pm
Form:	Webinar via Livestorm®
Prerequisite:	You are interested in protection of technical inventions and research in patent data bases.
Costs:	This webinar is for free.
Language:	English

Contents:

An invention must be new worldwide in order to be protected by a patent. Therefore, it makes sense to search for older, similar inventions before filing a patent application.

We will show you how to search the most important free search engines (see.ip, ESPACENET, DEPATISNET), and we will practice with you using practical cases.

After the webinar you will know

- which search engines are suitable for you;
- how to do simple searches yourself;
- what you can conclude from the search results;
- how to find out if and where a patent is still valid;
- why it makes sense to stay tuned to patent search!

Organisational matters:

In order to follow the workshop, we recommend to use two screens.

Please open the access link with Google Chrome, Mozilla Firefox, Safari, Opera or Microsoft Edge in a current version. More information on the browsers: https://support.livestorm.co/article/19-technical-requirements-livestorm

We look forward to your questions and contributions to the discussion.

If you have any questions or problems, please do not hesitate to contact us at

ip-academy@patentamt.at or by telephone on 01/53424.

See you soon. We look forward to seeing you!
